

POWER IN MOTION

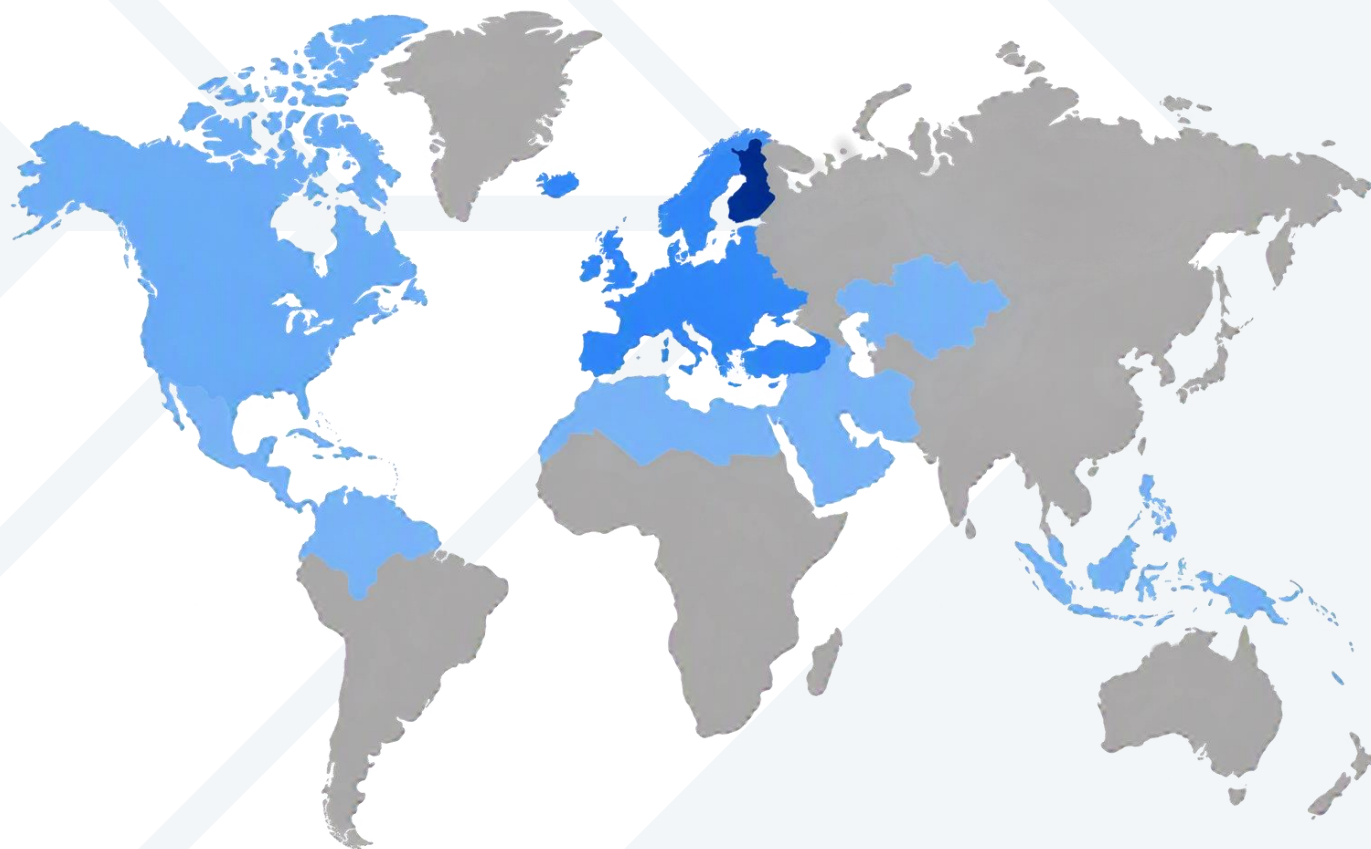

ADVANCED SHEET METAL PRODUCTION SOLUTIONS

By adhering closely to our core values - to create with care, competence and commitment - Samesor designs and delivers complete roll forming production systems for industrial manufacturing of high-quality sheet metal products.

- Complete roll forming production lines
- Tailored solutions for specific applications
- Machines built for efficiency and reliability

MACHINES INSTALLED AROUND THE GLOBE

Created in Finland, delivered to over 60 countries around the world.

To date, we have delivered over 1000 machines, many still rolling after decades of production.

For over 60 years, Samesor has supported the growth and strength of companies worldwide.

Fast response times - Guaranteed spare parts availability - Remote diagnostics - On-site support

We are your local, global partner

BEHIND EVERY SUCCESSFUL PROJECT

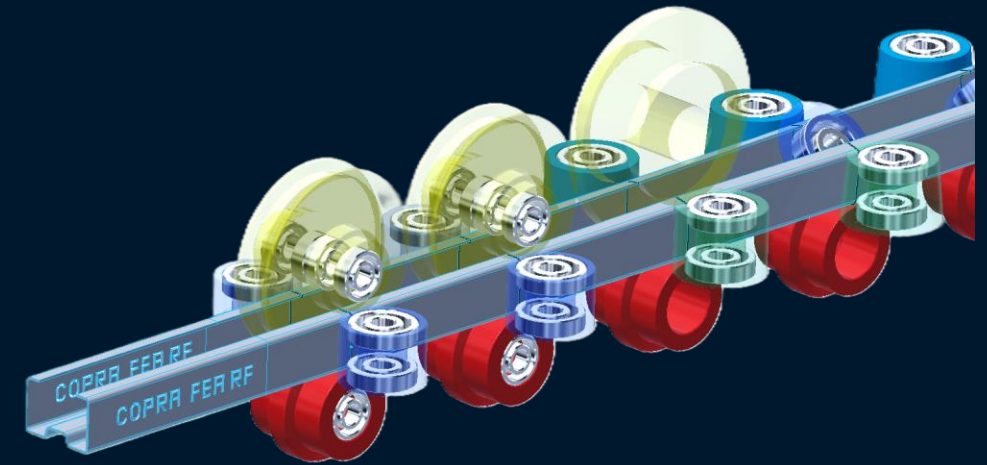

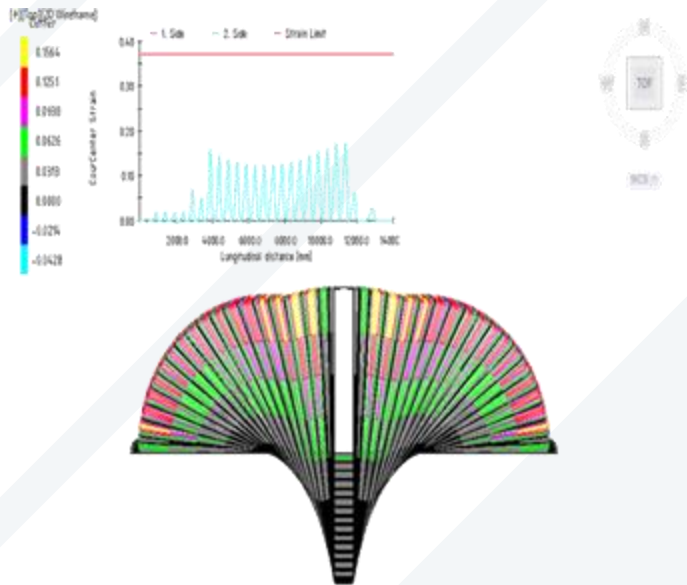

Samesor delivers class-leading machines because of the teams and skills behind every project.

- Dedicated mechanical design and engineering
- Cutting edge software and simulation capabilities
- Automation and software development
- Installation teams with worldwide reach
- Outstanding life cycle support and services

CUTTING EDGE TECHNOLOGY

With a dedicated design team and decades of experience in mechanical design and engineering, our capabilities are enhanced further by adopting the latest developments in software technology.

- We operate the only dedicated roll forming simulator in Finland, Data M's COPRA FEA.
- Roll forming tool simulation allows us to predict the outcome of your profile and how the material will behave, all in the digital world.
- Reducing trial and error on the factory floor, saving time and eliminating potential issues after production of the line.

AUTOMATION AND SOFTWARE DEVELOPMENT

Continuous software development is a crucial part of modern production methods.

Our dedicated team creates solutions that boost operational efficiency and extends the lifetime of your machine.

IN-HOUSE AUTOMATION TEAM

- Smart automation solutions
- Industry expertise
- Customer-specific development
- Remote diagnostics via remote connection

INSTALLATION BY OUR OWN EXPERTS

A critical step in the smooth transfer of a new line is the installation at your production facility.

Our experienced team:

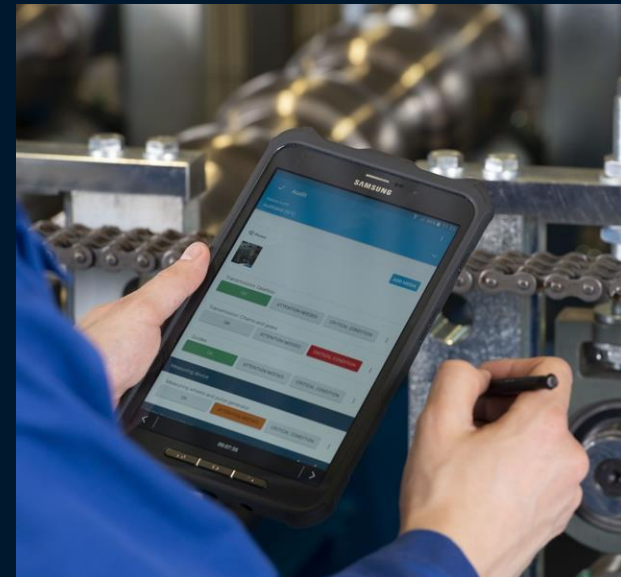

- Installs your new line
- Ensures it is running smoothly
- Provides operational training

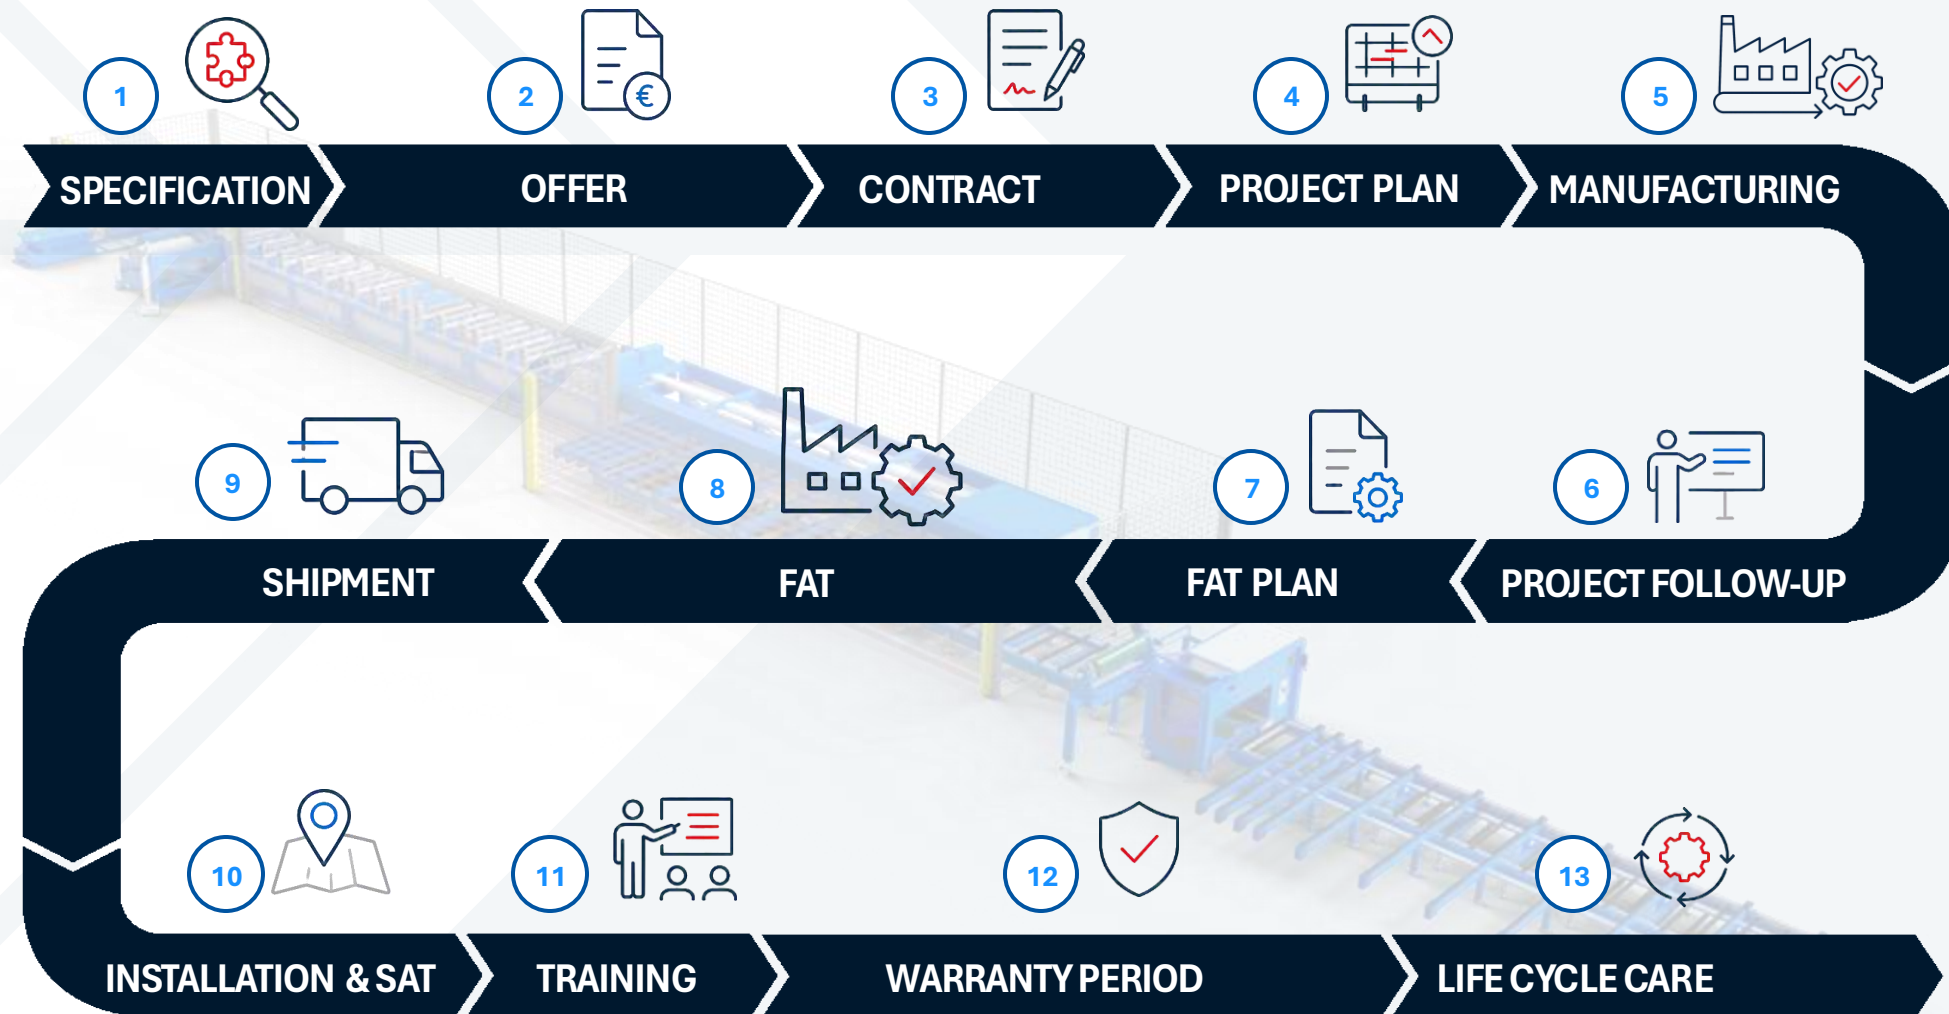

SAMESOR SERVICES

Long-term support ensuring lifecycle performance and reliability throughout the decades of your line's successful operation.

- Preventive maintenance services
- Machine auditing services
- Spare parts supply and reconditioning
- Control system upgrades and modernization
- Remote support and diagnostics
- Operator and technical training
- Product design services

STEPS TO PARTNERSHIP

1. SERVICES

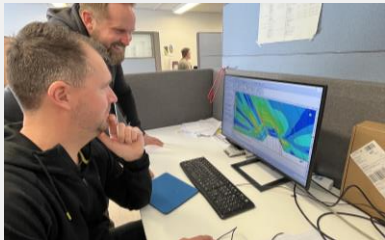

Samesor Services ensure operational support for the full life cycle of your machine.

SHAPING THE FUTURE OF ROLL FORMING

- Increasing automation and system intelligence
- Continuous innovation in roll forming technology
- Solutions designed for future scalability
- We don't just meet today's requirements — we prepare you for what comes next.

2. DESIGN

Our in-house Design team creates smart solutions for your line. From earliest concept to finalized profile.

3. AUTOMATION

The Automation team keeps us at the front of the latest software and operational development.

4. IN-HOUSE MACHINING

Our production facilities include in-house parts manufacturing. Accuracy and efficiency are in our own hands.

5. PRODUCTION

Fully equipped production facility from tool manufacturing to line assembly.

SAMESOR SOLUTIONS

- Metal roof tile profiles
- Roofing and cladding solutions
- LGS construction systems
- Industrial roll forming applications
- Value-adding equipment and systems
- Advanced automation development

METAL ROOF TILE LINES

- Conventional ridge-to-eave profiles
- Modular roof tile panels
- Tailored design capabilities

ROOFING, CLADDING AND DECKING

- Trapezoidal profiles
- Corrugated profiles
- Standing seam profiles
- Tailored solutions

LGS CONSTRUCTION SYSTEMS

- Light steel framing lines
- Purlin production lines
- Truss production lines
- Class range from entry-level compact machines to complete LGS productions systems

INDUSTRIAL APPLICATIONS

- Profiled components for HVAC
- Industrial frame and structural component lines
- Tube casing machines
- Solutions for channel profiles
- Flashings and strip profiles
- Machines for light fittings
- Custom solutions for unique profiles

VALUE-ADDING EQUIPMENT AND DEVICES

- Membrane applicators
- Thermoslitting units
- Profile curving devices
- Coil handling solutions
- Stacking and conveyor systems
- Wrapping and packaging devices

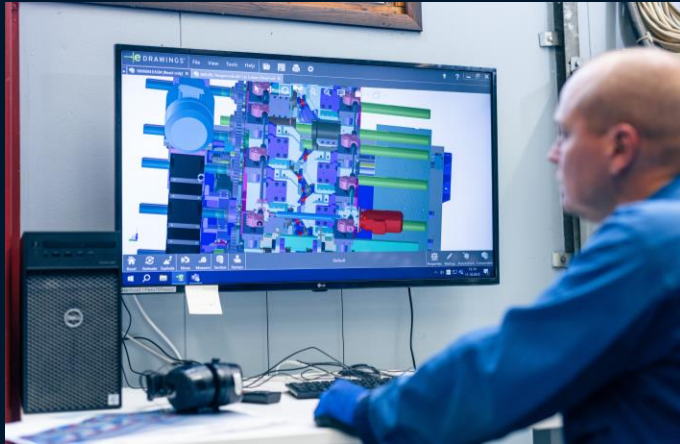

MACHINES THAT POWER YOUR BUSINESS

Our commitment, from concept to production, is to build machines that deliver the profile you need. Every solution is designed to operate reliably, efficiently, and consistently in demanding production environments, and every system is engineered around your final product.

- Designed for your specific application
- Optimized for efficiency and uptime
- Scalable for future growth
- Built for long-term reliability

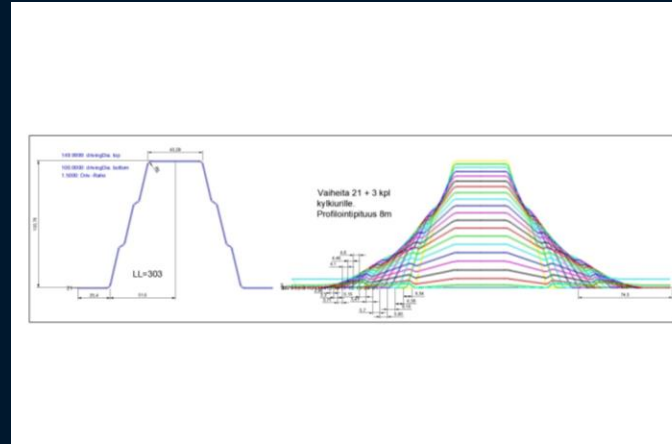

A SMARTER WAY TO MANUFACTURE

We solve complex production challenges

Through our unique design, automation, and production capabilities along with decades of experience, we will create the solution for you.

We design around your end product

This can mean a solution that is tailored specifically for you, or by one of our wide-ranging standard options.

We think beyond delivery as partners

Long-term performance, upgrades, and continuous improvement. Close collaboration from concept to full life-time operation ensures the best results for your business.

CUSTOMERS AROUND THE GLOBE

WHY SAMESOR?

- Proven roll forming expertise
- Customized production solutions
- High-quality and reliable machinery
- Strong engineering support
- Long-term service partnership
- Continuous innovation and product development
- Global reach with local commitment
